

# DVMAX Delivers The Paperless Practice

DVMAX Veterinary Practice Management Software  
Designed for Windows and Mac Paperless Practice

# Delivering the Paperless Practice

With over 20 years of product development and a solid foundation in the business of veterinary medicine, DVMAX has earned a reputation as the developer of the most powerful, yet easy to use veterinary software for both Macintosh and Windows. DVMAX helps maximize profits, eliminate missed charges and manage the day-to-day activities of your veterinary practice.

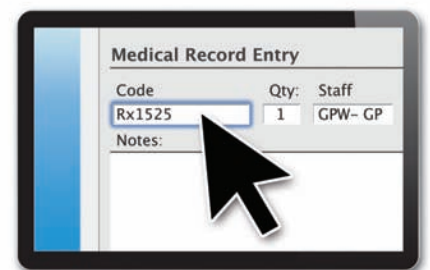

DVMAX is Fast and Easy - With a few clicks you can create a complete Medical Record Entry on a patient's record.	✓
DVMAX Makes the Most of Your Time - The single, simple act of creating a Medical Record Entry gives you data you can use in multiple places. - History, invoice, RX label	✓
DVMAX Increases Revenue - The paperless practice captures missed charges, and that means DVMAX more than pays for itself, year after year!	✓
DVMAX Doesn't Make "Typos"- Our efficient point-and-click interface results in accurate entries every time.	✓
DVMAX Integrates With Your Existing Systems - By working with other common devices and files, DVMAX becomes the digital hub of your practice.	✓
20 Years of Experience - Our proven commitment to our customers is borne out by our track record of timely, useful updates and support.	✓

## DVMAX Delivers the Paperless Practice

When it comes to keeping medical records, DVMAX gives you the tools to do it quickly and effectively, all while guaranteeing that charges for medical entries are automatically captured in the final invoice. The simple act of creating a Medical Record Entry automatically transfers data to an Invoice, Health Check Report Card and the Patient Medical History. You can also use the pre-built Clinical Findings to structure your Medical Notes while simultaneously creating Referral and Discharge letters with the built-in Word Processor. DVMAX Macros can help speed the entry of common and lengthy notes while Super Items allow you to quickly select the groups of services you provide most often for your patients.

## DVMAX Is Feature-Packed

DVMAX keeps your practice running smoothly and efficiently with standard features like emailing, white board treatment plans and log of automatic laboratory downloads. Combine these with impressive features such as built-in Word Processing, easy Search capabilities, Report Generation and it's easy to see why DVMAX is the most feature-rich and flexible software in the industry.

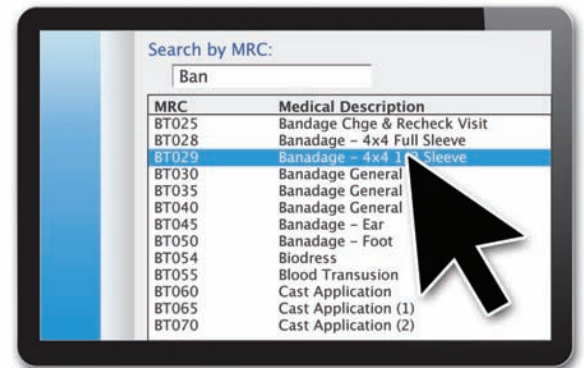

Invoice Entry      Health Card      Medical Record

A Medical Record Entry provides data that can be used in multiple places.

## DVMAX Reduces Input Errors

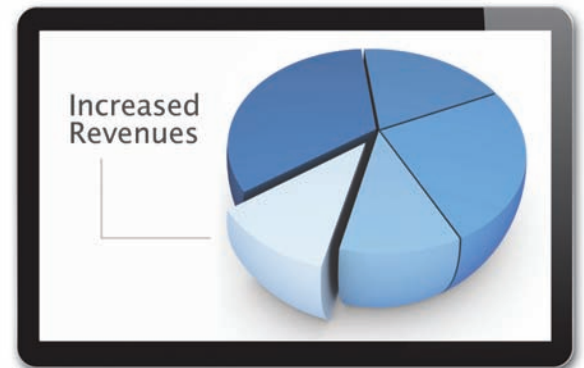

DVMAX's efficient point and click interface enhances accurate invoices and medical records. The reduced risk of human error ensures there are no discrepancies and that all pertinent data is added directly to each invoice. DVMAX **date and time stamps** each Medical Record Entry providing an error-proof **audit trail**. Extensive Finding Options and Macros reduce human error from typing, and pre-defined Super Items enhance speedy record entry while reducing the risk of missed charges.

DVMAX's point and click interface reduces input errors.

## DVMAX Increases Revenue

The paperless practice, with its intelligent workflow, simply helps you get your work done more efficiently. Less time, less effort, less repetition of tasks and fewer chances of human error means that DVMAX more than pays for itself, year after year! For example, using DVMAX can help you save labor time by combining the tasks of creating an invoice, medical record, discharge/referral letters and health check report cards. In a traditional **paper practice**, an invoice is generated at the front desk from a **circle sheet** or **travel sheet**. In the **paperless DVMAX practice**, there is no need to spend time and money entering invoices since the invoice is automatically generated when medical entries are created.

DVMAX Practice more than pays for itself, year after year!

## DVMAX Goes Anywhere

Away from your clinic? Not a problem. DVMAX lets you electronically access and transfer data while you're on the go. How? With features like:

- **The DVMAX Anywhere App** allows you to browse your appointments, search for patients and review medical histories from your iPhone or iPad.
- **MPA (Multi-Practice Access)** enables you to share client and patient data between clinics, ensuring that your patients' medical history entries are always accessible and current.
- **Remote Processing** allows users to work with the full office database while in the field - Greatly enhanced in version 7.5 with our new "one click" synchronization function.

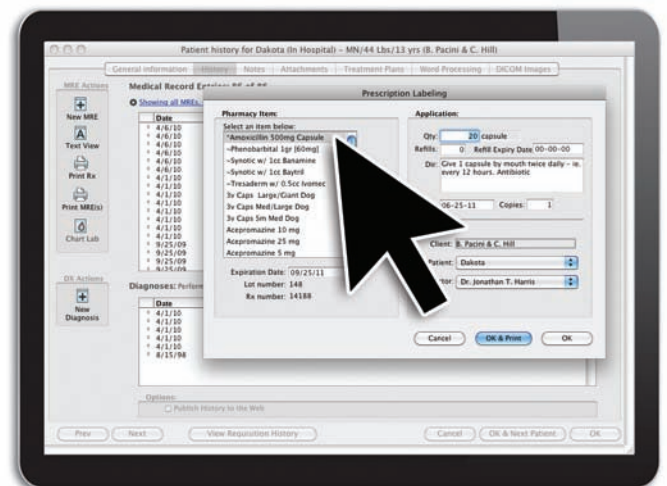

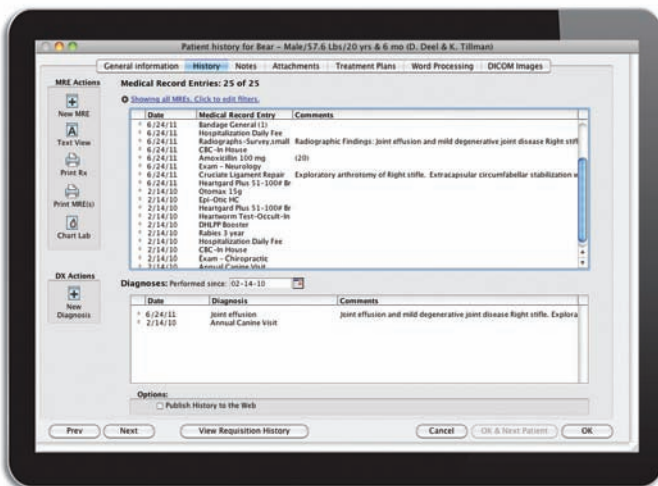

The DVMAX Anywhere App is available at the Apple App Store.

## DVMAX Practice - Better Animal Care through Better Software

# Make the Most of Your Time with DVMAX Practice

Writing up an exam should be easier than performing one. With DVMAX, Medical Record Driven Invoicing means that invoices are built as you add to a patient's medical history - when you're finished treating a patient, you can immediately present the client with an invoice. When you enter information into a patient's medical record, DVMAX automatically creates a client invoice, health check report card and discharge/referral letter, all within your DVMAX software.

DVMAX fits any size practice, computing environment or network and can import data from any existing veterinary software system. DVMAX is available for both Microsoft Windows and Apple Macintosh. Let DVMAX's 20 Plus Years of Experience work for you!

**Fast and Easy** - With the click of a button, you can create a medical record entry as shown above on this **Patient History Screen**.

**Make the Most of Your Time** - A point-and-click interface provides accurate results every time as shown above **Creating a Prescription Label**.
